### **TAILED ACTION**

1. This Office Action is responsive to the U.S. Patent Application Ser. No. 10/550,201 filed on October 31, 2005, claims **1-21** are pending in the application.

### ***Priority***

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Information Disclosure Statement***

4. This office acknowledges receipt of the following items from the Applicant:  
Information Disclosure Statements (IDS) filed on Sept. 21, 2005.  
Information disclosed and listed on PTO 1449 was considered.

### ***Drawings***

5. Figures **24-31** should be designated by a legend such as **--Prior Art--** because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Examiner's Statement of Reasons for Allowance***

6. Claims **1-21** are allowed.

Peng et al. (US 2006/0120147), Ezaki et al. (US 7,016,221), Yoshihara et al. (US 6,943,394) and Chen et al. (US 5,732,016) disclose a magnetic memory device and associated method having a read line and write lines similar to that of the present application, but fail to teach:

"wherein at least one of the first and second write lines is formed in a loop shape so as to include a bent portion and first and second portions connecting the bent portion and both ends, the magnetization direction of the magneto-sensitive layer changes according to a magnetic field generated by write current flowing in the parallel portion, and information is written" as claimed in the independent claim **1**; dependent claims **2-15** are therefore allowed because of their dependency on claim **1**; or

"forming at least one of the first and second write lines in a loop shape including first and second portions connecting a bent portion and both ends; providing a parallel portion in which the first and second write lines extend parallel with each other by bending at least one of the first and second write lines and making the first and second write lines cross each other" as claimed in the independent claim **16**; dependent claims **17-21** are therefore allowed because of their dependency on claim **16**.

Any comments considered necessary by applicants must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comment on Statement of Reasons for Allowance".
